Professional Summary

Results-driven Software Engineer with nearly 3 years of experience designing and delivering cloud-native, automation, and enterprise software solutions. Experienced in developing Amazon Connect contact centre solutions using Amazon Lex, Terraform, JSON, and AWS services, alongside a strong background in Microsoft Power Platform, Power Automate, and SharePoint. Skilled across the full software development lifecycle, including solution design, implementation, CI/CD, testing, deployment, and stakeholder collaboration. AWS Certified Developer – Associate and AWS Certified Cloud Practitioner with a passion for building scalable, reliable, and business-focused solutions.

Experience

Associate Software Engineer, *NTT Data* 03/2026 – Present
Bryanston

- Develop and maintain **Amazon Connect** contact centre solutions for ABSA Group, delivering intelligent call routing and customer experience enhancements.
- Design and implement **Amazon Connect Contact Flows** and **Amazon Lex** chatbot integrations to automate customer self-service journeys.
- Develop and maintain infrastructure using **Terraform** and JSON while supporting CI/CD deployments through **GitHub Actions**.
- Collaborate with business stakeholders to gather requirements, perform UAT, troubleshoot production issues, and deliver high-quality cloud solutions.
- Support the continuous improvement of Amazon Connect services through testing, optimisation, and production support.

Associate DevOps Engineer, *NTT Data* 10/2025 – 03/2026
Bryanston, Gauteng

- Supported CI/CD pipelines and deployment processes for enterprise cloud applications, improving deployment reliability and release quality.
- Assisted with environment configuration, application deployments, monitoring, and production support across development and test environments.
- Collaborated with development teams to troubleshoot deployment issues and improve delivery processes.
- Participated in system monitoring, validation, and operational support to ensure application stability and performance.

Associate software Developer, *NTT DATA* 05/2024 – 10/2025
Bryanston, Gauteng

- Developed enterprise business applications using **Microsoft Power Apps**, **Power Automate**, and **SharePoint**.
- Delivered workflow automation and document management solutions for enterprise clients, improving operational efficiency and document governance.
- Contributed to the successful delivery of projects including **AQD**, **IRIS**, and **Safripol EDRMS**.
- Worked closely with business stakeholders to gather requirements, develop solutions, perform testing, and support deployments.

Graduate intern, *NTT DATA* 07/2023 – 04/2024
Bryanston, Gauteng

- Completed the NTT DATA graduate programme, gaining practical experience across software development, cloud technologies, and enterprise platforms.
- Collaborated with cross-functional teams on client projects while developing technical, analytical, and problem-solving skills.
- Supported application development, testing, and solution delivery across multiple technologies.

Education

BSC in Computer Science and IT, *University of KwaZulu-Natal* 05/2023
Pietermaritzburg

Successfully completed my Bachelor's Degree in Computer Science and IT, with an expected graduation date of May 2023, after pursuing a 3-year course of study at the University of Kwazulu-Natal.

National Senior Certificate, *Port Shepstone High School* 01/2019
Port Shepstone

Skills

Microsoft Power Platform
(Power Apps, Power Automate, Power Automate RPA) and SharePoint Online

GitHub and GitHub Actions

Programming
Java, Python, C++

Cloud Computing
AWS Connect & Microsoft Azure

Team Collaboration and Independent Work

Terraform

Web Development
HTML and CSS

Database Management
SQL

Analytical and Problem-Solving Skills

Adaptability and Continuous Learning

Languages

- English

Certifications

- Certified SAFe 6 Practitioner
- Microsoft Certified: Azure Fundamentals
- AWS Certified Developer – Associate (DVA-C02)
- Microsoft Certified: Power Platform Developer Associate
- Microsoft Certified: Power Platform Automate RPA Developer Associate
- Microsoft Certified: Power Platform Fundamentals
- AWS Certified Cloud Practitioner (CLF-C02)

Key Projects

ABSA Group – Amazon Connect Contact Centre Modernisation
Contributed to the implementation of a cloud-based Amazon Connect contact centre solution for ABSA Group, delivering intelligent call routing, chatbot integration, and workflow automation to enhance customer experience and operational efficiency. Collaborated with business stakeholders throughout design, testing, deployment, and production support.
Technologies: Amazon Connect, Amazon Lex, AWS, Terraform, GitHub Actions, JSON

IRIS – Internal Document & Records Management System
Developed features for an enterprise document management platform used across business units, enabling automated document generation, workflow management, and SharePoint integration to improve collaboration and operational efficiency.
Technologies: Power Apps, Power Automate, SharePoint

Automated Quality Documentation (AQD)
Helped develop an Electronic Document and Records Management (EDRM) solution that automated document workflows, version control, and compliance processes, reducing manual effort while improving audit readiness and document governance.
Technologies: Microsoft Power Platform, SharePoint, Power Automate

Safripol – Electronic Document & Records Management Solution
Contributed to the delivery of an enterprise EDRM solution that streamlined document lifecycle management through automated workflows, permissions management, and approval processes, improving compliance and reducing administrative overhead.
Technologies: Power Apps, Power Automate, SharePoint
